## DETAILED ACTION

### *Drawings*

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because figs 1, 2, 13, 15, 17, 18 and 19 are not formal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 8-9, 13, 20-21, 24, and 34-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Eraslan (US 6,801,641).

As to claims 1, 13 and 24, Eraslan disclose a Three Dimensional Face

Identification System comprising:

Searching a plurality of facial codes based on information designating at least one facial

Feature (column 3, lines 5-24), each facial code defining a digital representation of a face (column 3, lines 40-45); and outputting results of the search (column 3, lines 48-50).

As to claims 8, 20 and 34, Eraslan discloses the method of claim 1 (see above), further comprising: acquiring an image of a subject (column 3, lines 57-60); and Receiving the information designating said at least one facial feature from a user (Fig.33), said at least one facial feature belonging to the subject in the image (fig.33).

As to claims 9, 21 and 35, Eraslan discloses the method of claim 8 (see claim 8 above), further comprising: outputting the image of the subject on a display to enable a user to identify said at least one facial feature (fig.33).

#### ***Allowable Subject Matter***

4. Claims 2-7, 10-12, 14-19, 22-23, 25-33, 36-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***CONTACT INFORMATION***
